Professional Licensure Division (continued)

- ARC 7442B Proposed rules 201.3, 206.1, and 208.3 generated many comments. Mr. Nemmers asserted that the rules are beyond the authority of the board in that they regulate physicians, not just physical therapists, and that the proposed rules are inconsistent with existing laws and rules, which allow a physician to refer patients to persons in the employ of the physician. Discussion related to the concept of medical home, integrated care, quality of care, cost efficiencies, patient choice, and scope of practice.
- Mr. Ungs indicated that the proposed rules are intended to preserve patient choice and protect the public. Dr. Mahoney commented that mechanisms are already in place to prevent inappropriate referrals. Mr. Ward expressed support for integrated care. Dr. Carlson stated that therapy provided in the office is an integral part of patient care and that some patients want their physician to oversee the therapy. Ms. Stilwill concurred with comments offered by the Iowa Medical Society in opposition to the proposed rules. Mr. Kelinson expressed The Iowa Clinic's opposition to the rules. Ms. Huston and Mr. Rippey asserted that more services are prescribed and the cost of care is higher when a physician makes a referral to a therapist in the physician's employ.
- Motion to refer Rep. Upmeyer moved a referral to the general assembly. This motion does not impede the rule-making process.
- Motion carried On a vote of eight in favor and one "pass," the motion carried.

- ARC 7474B Amendments to ch 113 are intended to address the grounds for the Objection that was imposed by the administrative rules review committee in December of 2007. Mr. Moon reported that these amendments will benefit 15 of the 19 landfills that were adversely affected by the rules that were the subject of the Objection. Mr. Tack identified the four landfills (South Dallas County Landfill, Page County Landfill, Des Moines County Landfill, and Waste Management's Central Disposal in Winnebago County) that are still affected. Mr. Landa and Mr. McLellan asked that affected landfills have the option of installing a drainage mechanism to divert leachate from the vertical expansion area into the lined portion of the landfill. Ms. Turkle clarified that the drainage layer would be composed of sand or tire chips. Committee members discussed options such as a Session Delay or an Objection. Mr. Landa commented that he did not want to delay the rules, as that would interfere with the ability of some landfills to go forward with the agreements they have reached with the department.

- Motion to object Sen. Courtney moved an Objection to ARC 7474B.

- Motion failed On a vote of five in favor and four opposed, the motion failed.
